

Bridging the gap

Building better collaboration

Between designers, developers and stakeholders

Why collaboration fail?

Communication is our superpower.

Communication collaboration goes ahead to hand

Lack of collaboration bad communication skills they all are interconnected.

Collaborators versus competitors

But collaboration give you silos

Feedback gap: lose the ego critic the problem, not the person

Say things clearly

Learn basic terminology.

Keep it simple.

Ask, don't assume

Data plus emotion equal convincing arguments

Fuck alone don't persuade but stories to

Storytelling increase buy in

Clarity over confusion.

Emotional by in.

Stronger influence.

Focus on outcomes, not just the work behind them.

Lack of confidence equal bad collaboration.

Channel your creative confidence

self Belief

Value in experimentation.

Team collaboration.

Book recommendation creative confidence

creative confidence is different than arrogant and disillusion

Bridge gap between coworkers

Level up your soft skills

Take time before answering.

Emotional intelligence.

Communication

Active listening.

Time management.

Be flexible.

Empathy

project Management

Understand the politics don't be a politician.

Foster diversity

connect The dots

Be transparent

Ask and listen

Use visual aids

Simplify

Frame ideas with business and user impact.

Bring key people early.

Define success clearly.

Stay emotionally steady.

Handle conflicts with openness and understanding.

Frame conflicts as opportunities

AER as a triangle

A equal Align, common granted

E equal educate

R. Equal reinforce.

A.

Define successful early.

clarify roles

Shared language

E

Explain trade off clearly

Tell compelling story

Encourage crossing team work

R

check in regularly

Celebrate win.

Adjust when needed.

Stakeholder function team.

Collaboration

What will I be covering?

Why collaboration fails

How silos and miscommunication create friction.

Fixing communication and trust

Using storytelling, manage ego, and build trust.

Building better collaboration habits

Apply frameworks, focus on alignment, and make small impactful changes.

Feedback gap.

Lose the ego

Criticise the problem not the person feedback is about providing the work not

attacking individuals.

Data not just opinions decision should be backed by user feedback AB test and we are insight rather than personal preferences

Make communication clear and effective.

Learn basic terminology a little effort and understanding each other goes a long way.

Keep it simple explain it like you are talking to a five-year-old.

Ask, don't assume clarifying questions prevent misunderstanding and build trust

Storytelling buying

Clarity over confusion helps get through technical jargon and makes complex ideas. Easy to understand.

Emotional buying facts tell story sell

Stronger influence the right narrative makes it easier to get stakeholders, developers and teams on the same page

What is creative confidence?

Self belief trusting in your ability to make creative changes.

Value in experimentation, trying something new regardless of the outcome.

Team collaboration valuing perspective to produce innovative results

Why is creative confidence important?

For you to challenge something creatively

Helps with impostor syndrome.

Confidence versus arrogance

Confident people invite open discussion.

Oregon, people shut it down conversations.

Collaboration surface went strong opinions turned into one way conversations

Be transparent, drop the dog ad up your message to your audience.

Ask and listen be an active listener not a passive one mutual understanding avoid misalignment

Use visual aids whiteboard wire frame and sketches communicate faster than words.

Simplify keep it clear, concise and actionable

Frame ideas with business and user impact show the business case for your ideas. How does it increase revenue retention or solve real problems?

Define success clearly ensure everyone agrees on success metrics before starting a project

Bring key people in early a line on goals from the start to avoid last minute misalignment

Stay emotionally steady frustration from leaders in Foxboro and performance stay constructive

Educate.

Show trade-off use data pro stories and encourage learning

Explain traders clearly show impact on users business and check feasibility.

Tell compelling stories use data plus emotion to drive buy-in

Encourage cross team learning make knowledge sharing a habit

Reinforce

Check in regularly celebrate wins, adjust when needed

Check-in regular regularly keep teams updated not just a kickoff.

Celebrate wins recognise when collaboration works well

Adjust when needed be open to revisiting decisions as new insights emerge
