

The forgotten art of field-based user research

Hyper connectivity.

Screens friends or foe?

We are gradually losing the richness of human interaction.

Digital natives

Post pandemic behaviour shift

Mental health.

Multi screening is the norm

Productivity is a trap becoming more efficient just makes you more rushed.

Efficiency is different than authenticity.

Slow down.

Should adopt some of the principle of slow culture it doesn't mean to do less

Gave our self time to observe to actively listen.

Venn diagram description of the Venn diagram three circles

1 In-person rapport and interaction use voices is amplified

2 immersion into environment observed things that don't get

3 scope for serendipity unplanned bonuses

Intersection of the three circle rich insights

Real-time response to visitors experience

Spontaneous testing.

Sneak preview of upcoming major exhibition

Testing across a range of on-site staff

Live observation of Customer service interaction.

Wide ranging reaction to spontaneous reaction

Real world condition observed.

Real world finding challenge risky assumptions

How to make fieldwork work.

Require requires.

Venue hi.

Logistic

Facilities

Incentives

Go with an open mind and heart.

Fieldwork is a great way to engage your clients.

Impact

Which inside tell the best stories

Bring to life the human reality.

Show you understand the problem.

Articulate timetable user need

And with the Room map of action

The benefit of slowing down

If we give ourselves time to observe to actively listen and to be most in our subject will get a deeper sense of meaning purpose and insight from our work.

Playback the story.

Work as more potential for impact

Rich quality insights tell the best stories

Bring to life the human reality don't drawn in that data.

Show your you understand the problem validate assumptions.

Articulate timetable user need think product backlog

And with a roadmap of action that you can help deliver

Co-work the experience

Feed work is a great way to engage your clients.

Type the hive mind first proxy ethnography

Work in Pairs recruit your client if possible.

Share the analysis, build your allies.

validate your risky assumptions

agree recommendations together?

Go with an open mind and heart.

Feed work and sometimes feel less , predictable controllable

Welcome with warmth and reassurance break the ice.

views may vary tangent will happen

Want to have a voice gently?

Empathise acknowledge the sharing of sensitive subject.

Avoid something tokenistic link involvement to outcome

	Use in-person methods when...	Use screen-based methods when...
	Environmental context is crucial to understanding user behaviour	Users need to be observed in their natural digital environment
	Observing body language and non-verbal cues is important	Remote participation is needed for reach and/or accessibility
	Immersion in the users' real world can reveal unexpected insights	Focusing on cognitive tasks that don't involve any physical interaction
	Tasks involve physical stimulus or offline interactions	Longitudinal studies capturing reflections over time (e.g. diary

We are not meant to be measured by how fast we go, but by how deeply we

live.
