

Designing the next evolution of us

Best way to add value in the 21st century is to connect creativity with technology.

Designed Led organisation or worth trillion

Jony Ive have a contact with opening eye in six .5 billion

AI will replace design?

Design is how people trust new tech landscape is changing

AI can allow you to build one person company with 1 billion

the role of design is evolving thing bigger and deliver an end to end products being a hybrid of all aspect of design in a start up.

Start up wants designer who thinks bigger and better

Endure adapt prevail

Getting overwhelmed by the number of tools that come out every day.

AI makes me more efficient.

Look into Figma new features.

Prototyping fast to train you.

Taste is a unfair advantage advantage against AI.

What is taste?

You know what's elegant cringe timeless it's not just style it's judgement.

The entering edge

What makes you irreplaceable is isn't what you know. It's what you feel.

Shifting towards creators

Your creator values don't wait for permission.

Just do it.

Shape don't just shape.

Designer misunderstand the business.

Impact of design can be huge in some of the best company worldwide

Create new role for designers.

Bolt
GoogleLLM notebook
Grammarly
Design OPS is critical
What is design OPS

AI is affecting how we work

"It's completely reversed my design process, instead of agonizing over getting started, I use AI to generate a bunch of rough direction quickly, then spend my energy on refinement and ensuring quality. It's more efficient and honestly more enjoyable."

"The tools are fragmented and ever-changing. You're constantly learning the tools instead of perfecting the process"

Here is a summary of your talk notes, incorporating content extracted from the uploaded slide images and defining the acronyms mentioned:

Talk Summary: Designing the Next Evolution of Us

Key Themes

- **Creativity + Technology = Value:** The most impactful way to create value today is by combining creative thinking with technology.
- **Design-Led Companies:** Organizations driven by design (e.g., Apple, led by Jony Ive) can achieve trillion-dollar valuations.
- **Evolving Role of Designers:**
 - Designers are no longer just visual creators; they are now strategic thinkers, technologists, and storytellers.
 - Startups seek designers who think holistically, are adaptable, and can deliver full end-to-end products.
 - The ideal designer today is a hybrid: part product thinker, part technologist, part business-savvy creator.

AI and Design

- **AI won't replace design—it redefines it:**
- AI tools help designers start faster, iterate more, and focus their energy on refinement.
- Designers with strong taste (a sense of elegance, timelessness, and judgment) maintain a unique edge over AI.
- Taste becomes an "unfair advantage"—not just about style but about making qualitative decisions.

- **AI Tools Mentioned:**
- Dipstick, ChatGPT, Claude, Bolt, Google LLM Notebook, Grammarly
- Figma plugins like Google Calendar integration
- AI has changed workflows: Start with rough AI drafts, refine with human creativity.

Practical Design Advice

- **Prototype Fast:** Use tools like Figma to iterate quickly and train your design intuition.
- **Don't wait—create:** Adopt a creator mindset. Don't wait for permission or perfect tools—just build.
- **Sales is a design skill:** Designers must sell their ideas internally (to leadership) and externally (to users).

Design OPS

- **What is Design OPS?**
- A discipline that streamlines and scales the design process across teams.
- It includes workflow systems, tooling, cross-functional collaboration, and process consistency.
- **Quote on Workflow Shift:**

"AI has completely reversed my design process. Instead of agonizing over starting, I use AI to generate many rough directions quickly. Then, I focus my energy on refining and ensuring quality. It's more efficient and more enjoyable."

- **Challenges:**
- Tool fragmentation: The constant release of new tools can overwhelm designers.
- Continuous learning is now a requirement—mastering the process is harder than ever.

Strategic Business Terms (Acronyms Defined)

Acronym Meaning

PMF Product-Market Fit

GMT Go-to-Market (strategy)
