

Everything changes, but you design in the AI era

Change

New technologies and ideas shaped places and the industries in the industry that we are in.

Being in the moment,

content Design

Understanding context.

Care.

Where we are, who we are what we care for

Permacrisis.

Recognising the state of change in 2025.

Design is being questioned.

In government, it's just so much easier to here tear things down than it is to build this up

Technology is essential to everything.

Book recommendation multiplied

The AI era.

New technologies and ideas we share places and the industries

London tech week

Book recommendation the coming waves.

Technology alone is not the answer.

Book recommendation the AI con

To fight big tech hype and create the future we want

Design human systems.

Recommendation a story of where I used to work careless people

Meaning of failure to give sufficient attention to avoiding harm or errors equal negligence

The world needs good design.

The world has enough.

AI create average rate

Generate AI = average machine

Go beyond average design.

The human part that makes it interesting

Creativity is about having a point of view.

It's how we learn to look at the world and respond to it.

Looking at interview May 2025 of Jonny hive

Invest in design

It's what we do when no one sees

'Jobsian' principles still stand they are about care

1 people focused

2 diverse reach and thinking

3 Visual and creative

4 ideas and change made real

5 impact focused

6 Bold and ambitious

Good design is imagination and inspiration.

youngminds.org.uk

Book recommendation how big things get done.

Design learning by doing

The hard work in transforming our human systems is consensus building and simplifying delivery complexity.

Good design a strategic in going further and deeper.

Focusing on service outcomes while recognising whole system systems

Underpinning work with user focused technology decisions

Book recommendation to pose you are not a to do list

Design is how we and then how we respond.

To look is a lack of choice.

How can be very creative, thanks to the constraints.

Fingerprint are important

where do we leave them sense of care?

Your fingerprints are in the right things.

Design is about finding ways to make meaningful
