

Jammings is in the detail details

Drawing exercise listening to your neighbours explanation of what they did yesterday and drawing it on a piece of paper what this exercise conveys as emotion

Formulating, captivating fun I suck at drawing vulnerable being open exposed chaotic organic creative processing.

It is an Activity to start a design research workshop

Give people confidence in a way to communicate.

Sketch a lot to communicate things

1 the power of the random

Useful for

Cutting through advance solutionising

Shaking up prior knowledge

Opening up perspectives

Life is random,

useful tools

Perchance -> creating and sharing random sentence generators

Example of question : How might a glass Oli be impacted by this?

Nice way to extract yourself from the choice.

Make people think differently

Transfeminism Oracle is another tool

another tool empathy prompts

Useful for initial ideation

2 world café

Almost everything

It is perfect.

Greatest technique

People in group in a space

Elect a scribe.

Give time to discuss an angle

After the time the group moved to the next space, except for the scribe

Continue until you've gone through all spaces

It can be applied to anything.

Where you want to split up

A project into steps.

Example character sheet

Is so valuable

Multiple perspective and it is grounded, due to time limit

3 prototyping the one thing

Quickly seeing which ideas don't work

Prototypes are about seeing how wrong we are.

Make them simple.

easy To discard

As tested as possible

Storyboarding are useful.

What's the one thing that could have changed the story?
