

Designing in space time by Vicky Tan

She wrote a book called ask this book a question
Behavioral science

Do product decision align with our values?
Today's technology
How our current tools benefited or taken away something
Example
camera Take us out of the moment
Zoom blurry boundaries we are floating.
Apps it is convenient multitasking we can't be bored.
Loss of autonomy.
loss Of sensory experience

Are we losing our ability to experience boredom?
Past technology
Paper
put down your thoughts.
Share knowledge.
ripple effect
Too much info
Loss of memory

Table
Dining rituals
ripple effect
hierarchy
Sedentary

Clock
Synchronised
routine
Quantified
Measure
ripple effect
Temporal anxiety
Loss of natural rhythm.

Technology has altered our human experience.
Unintended side effect

Past present future coexist.
They exist in the same space
It is like cities on the map it is like Pages on a book.

Vicky's career

Spotify.

Past

You're taking a risk when you're buying a vinyl.

It is physical.

Listening is more clear

Present

Streaming ripple effect dilution of quality

Future

Intelligent audio companion ripple effect loss of silence

we should try to design in the future by looking at the experience of the past

trying to come to have together higher quality music trying to not be

disconnect from reality.

headspace.

Past

Vipassana

Present

10 minute meditation a day ripple effect minimum viable

Future

Always and support ripple effect loss of self reliance

Reflecting on past successes, why also creating room for the future?

1 imagine your design in space time

2 notice the ripple effects

3 prototype across time

4 build temporal awareness

Books recommendation

Hannah arendt the human condition

Eric Vagle time loops.

LM Sakas the Convivial society

Asere Kolke this could be our future.

Ask yourself, how did we do it before?

What do we lose?
